# Classroom Certifications

Technology Training Summer Opportunities

SUMMER CERTIFICATIONS AVAILABLE

Document Camera

The certification will take participants through an in depth understanding of the fundamental workings of a document camera. They will leave with a greater knowledge of how to utilize the basic features and properties within a classroom setting.

Galileo

This process will innate individuals to discover and explore the reports that are available through ATI-Galileo. Participants will develop a hands-on interaction with the system by creating and scheduling assessments for staff and students.

Infinite Campus-Parent Connect

This certification provides a fundamental working knowledge of how teachers communicate with parents on infinite campus, with a hands-on training of teacher to parents messaging, websites, and student work submissions. Throughout this process individuals will see the view of teacher and parent through Parent Connect.

Projector

This process will create a solid understanding of the interworking of a classroom projector. The participants will widen their understanding of the features available with all basic, and wireless projectors.

Tablet/Data Storage

This course captures the essential tools of the tablet that will enhance the user's experience. These tools can be implemented in a educational platform and will include the district's policy for saving and storing data.

Tyler Pulse

This procedure introduces staff to the navigation of the Tyler Pulse system using filters, reports and data. With an insight to the system, participants will have practical experiences finding and utilizing the data collect by the district to drive instruction.
