

Cause & Effect

Name: _____ Date: _____

A **cause** is something that leads to another thing happening. An **effect** is the thing that happens because of the first thing.

Example:

After the power went out, the restaurant closed its doors early.

A restaurant cannot be open without power. It also would not close early unless there was a good reason. So, the cause was the power going out, and the effect was the restaurant closing early.

Write the cause and effect of each sentence.

- (1) Allison studied her spelling words, and the next day she got a perfect score on the test.

Cause: _____

Effect: _____

- (2) Ryan spilled juice on the floor, so he got a mop to clean it up.

Cause: _____

Effect: _____

- (3) They brought umbrellas because it was raining.

Cause: _____

Effect: _____

- (4) Timothy felt sleepy in school because he was up so late the night before.

Cause: _____

Effect: _____

- (5) Since the children were good, they got to watch cartoons after lunch.

Cause: _____

Effect: _____

Cause & Effect

ANSWER KEY

A **cause** is something that leads to another thing happening. An **effect** is the thing that happens because of the first thing.

Example:

After the power went out, the restaurant closed its doors early.

A restaurant cannot be open without power. It also would not close early unless there was a good reason. So, the cause was the power going out, and the effect was the restaurant closing early.

Write the cause and effect of each sentence.

- (1) Allison studied her spelling words, and the next day she got a perfect score on the test.

Cause: she studied her words

Effect: she got a perfect score
