

## **Source A: Excerpt from Henry Ford's *The International Jew*, p. 201-202**

The Jewish Problem in the United States is essentially a city problem; great cities are the areas in which most all national diseases have their origin. It is characteristic of the Jews to gather in numbers, not where land is open nor where raw materials are found, but where the greatest number of people abide. This is a noteworthy fact when considered alongside the claim that the Gentiles have ostracized them; the Jews congregate in their greatest numbers in those places and among those people where they complain they are least wanted!

The explanation most frequently given is this: the genius of the Jew is to live off people, not off land, nor off the production of commodities from raw materials, but off people. Let other people till the soil; the Jew, if he can, will live off the tiller. Let other people toil at trades and manufacture; the Jew will exploit the fruits of their work. That is his particular genius. If this genius be described as parasitic, the term would seem to be justified by a certain Fitness.

In no other city of the United States can the Jewish Problem be studied with greater profit than in the city of New York. There are more Jews in New York than anywhere else in the world; at least one Jew in every ten resides in New York. Jews exert more power in New York, and from New York, than they have ever exerted during the Christian era in any place, with the exception of present Russia. The Jewish Revolution of Russia was manned from New York. The Jewish government of Russia was transported almost as a unit from the lower East Side of New York. The general run of shopkeeping, from the great departmental stores to the smallest "junk" shop, is practically monopolized by Jews. The legal profession is predominantly Jewish. From news agencies that distribute news to the newspapers, to the newspaper that prints it, to the news-stand that distributes the national reading matter, the control and in most cases the ownership is entirely Jewish. In Wall Street the Jewish element is both numerous and powerful, as might be expected of a race which from early days has played an important part in the financial operations of the world.
