

PARENTLINK

The Unified Approach to Interaction

IT TAKES A VILLAGE

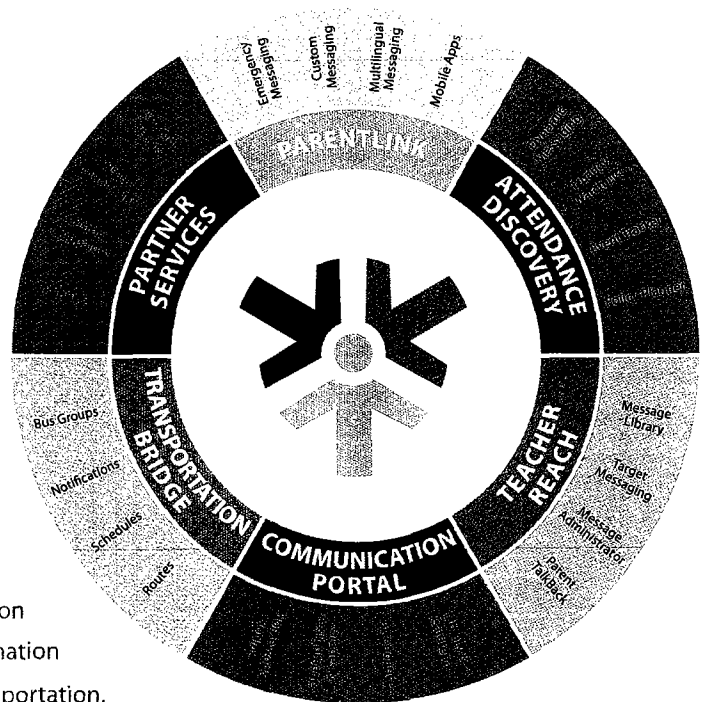

Creating educational communities is about building partnerships between the school, the family, and the public to help students succeed. The ParentLink parent and community relationship management system gives you the tools to interact and manage your relationship with these key stakeholders.

MAKE IT SIMPLE

Take the complex world of parent and community communication and make it simple. With the ParentLink system, educators, parents and the community can interact more frequently, quickly and easily. By combining all the different types of interactions into one system, district leaders can manage the communication and measure successful use.

CONSOLIDATE

ParentLink consolidates your disparate data systems, allowing everyone to find the information they need in one place. We bring together information from your SIS, gradebook, cafeteria, library, transportation, HR database, calendars and social media sources.

New in ParentLink 9

TIP LINE

Keep your schools safe with the ParentLink 4-in-1 tip line. Students, parents, or anyone in the community can submit tips by phone, text, mobile app or web.

DISTRICT MOBILE APP

Give your parents and community an easy way to keep up with the school and get involved with the ParentLink mobile app.

DASHBOARD

Track your progress toward creating an educational community. Measure parent and community activity, school adoption, parent outreach and more.
